

## SUSTAINABLE PURCHASING POLICY

Sustainability is a growing issue in today's society. Balancing the economic, social and environmental performance of an organization is crucial to the success of your business. Good performance depends not only on the company itself, but also on the performance of the suppliers of products and services used in its operation. It is, therefore, important as these are also governed by certain directives.

MOLDIT has defined the following requirements for its suppliers:

- Compliance with applicable legal and regulatory requirements;
- Compliance with the purchase requirements set by MOLDIT for the supplier category;
- Compliance with the ethical principles and conduct set out in the MOLDIT Code of Ethics and Conduct;
- Commitment to send the information requested by MOLDIT, necessary for the fulfilment of its internal safety and environmental requirements (product safety data sheets, term of responsibility of service providers, among others);
- Active participation in the community in which the supplier is located;
- Commitment to continuous improvement.

This policy is shared via email with suppliers and is on the MOLDIT website for access by all interested parties and other public.
